

4G Dual Lens AI Dashcam with Built-in Radar & Bluetooth

The cutting-edge 4G AI Dashcam will give a powerful support for Fleet Management. The new Millimeter Wave Radar will protect your vehicle against any risk in advance and the built-in Bluetooth Gateway will be able to connect any BLE device you want.

Key Highlights

- Support embedded 2K(2560*1440) +1080P dual camera, extended 2*1080P Camera
- Built-in Bluetooth BLE5.4 to support multiple BLE sensors
- Support Bluetooth Mobile APP/Button Immobilization
- Support 7*24hours Sentry Mode to wake up Dashcam via Millimeter Wave Radar
- Support ADAS+DSM+BSD AI Algorithm
- Built-in GPS/4G/WiFi Antenna & Module
- Support Harsh Braking/Speeding/Turning/Collision alarm via inertial GPS module & 6 axis gyroscope sensor
- Support Two-Way Voice Communication via GSM
- Embedded SOS Panic Button
- 2*IO & 2*RS232 interfaces

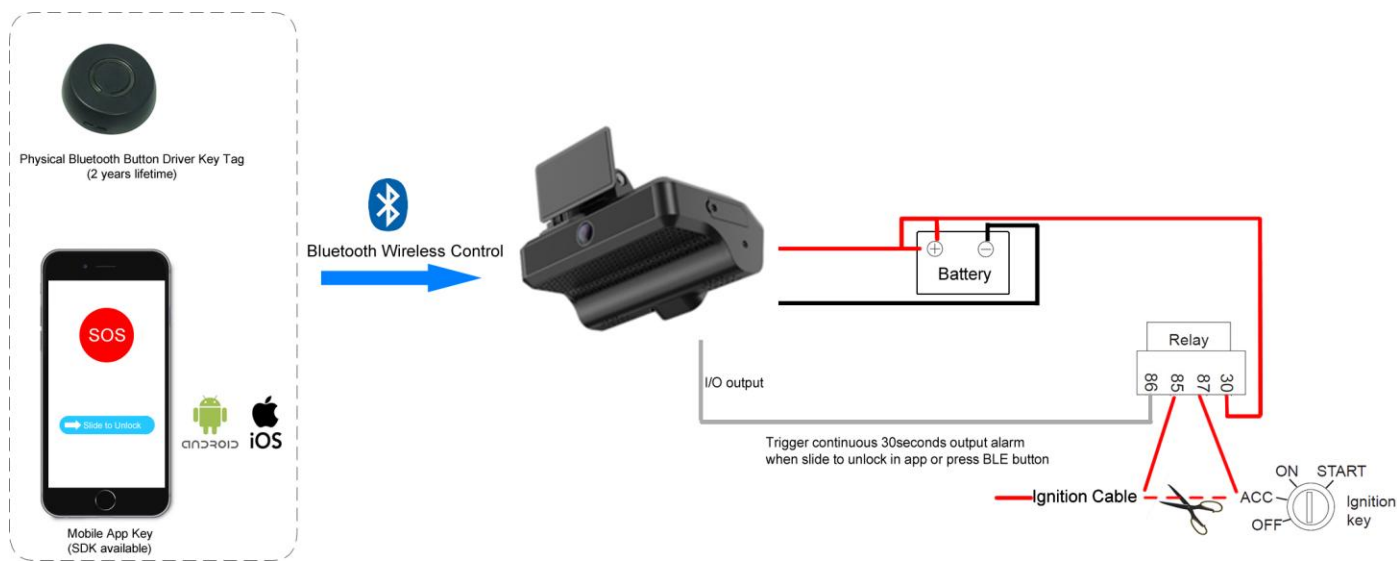

0.2~ 3meter

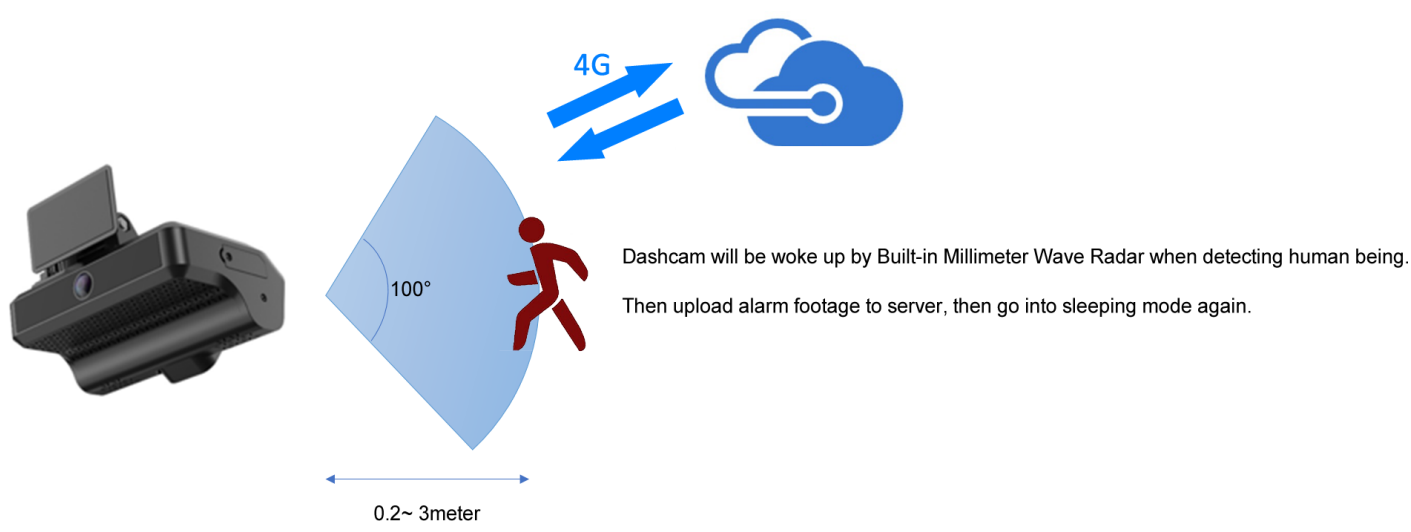

4G Dual Lens AI Dashcam with Built-in Radar & Bluetooth

1. How does Bluetooth Mobile APP/Button control immobilization?

2. How does Sentry Mode work via Millimeter Wave Radar?

4G Dual Lens AI Dashcam with Built-in Radar & Bluetooth

3. What kind of Bluetooth sensors can be connected?
BLE fuel sensor, Panic Button, Temperature Sensor, Speed Sensor, Door Sensor, Driver Heart Rate sensor, etc.
